

APEC Experts Group on Illegal Logging and Associated Trade (EGILAT)

Timber Legality Guidance Template for Malaysia

The purpose of this guidance template document is to provide APEC member economies with guidance on compiling the appropriate information for businesses and governments within the APEC region regarding timber legality laws and regulations in place in Malaysia. It follows from multiple discussions at EGILAT meetings in which it was recognised that it would be beneficial to compile the laws or regulations of APEC economies governing timber production and trade with a goal of supporting legal timber trade between APEC members.

[Note: This document should reflect the laws or regulations that are in place within each APEC economy. Where a particular element of this document is not relevant to an economy, it does not need to be completed.]

Disclaimer: All information stated in this guideline is updated as of September 2025.

1.0 OVERVIEW OF TIMBER LEGALITY IN MALAYSIA

Malaysia covers an area of about 33 million hectares consisting of 3 regions: Peninsular Malaysia, the state of Sabah and Sarawak. Malaysia regards its natural forest resources as an important and valuable resource that contributes significantly towards the economy and environmental well-being. As such, Malaysia is committed to ensure at least 50% of her land area remains as forest and adhered to the Principle of Sustainable Forest Management (SFM). In addition, Malaysia encourages SFM through forest certifications that among others include the Malaysian Timber Certification Scheme (MTCS), Programme for the Endorsement of Forest Certification (PEFC) and other internationally recognised scheme. These schemes continuously support the trade in timber and timber products that use wood originating from sustainable and legal sources that take into account the environmental, social and economic aspects of SFM. Generally, there are four categories of forest: Permanent Reserved Forest (PRF)/ Permanent Forest Estates (PFE)/ Forest Reserve (FR), state land forest, alienated land and Industrial Timber Plantation (ITP). The management of the forestry sector is governed under the Malaysia Policy on Forestry, which encompasses the key aspects of the forest policies of Peninsular, Sabah and Sarawak. The policy's statements, rationale and objectives serve as a reference and guidance for the three regions in formulating their respective forestry policies and strategies in which are reflected in the Forestry Policy of Peninsular Malaysia, Sabah Forest Policy and Sarawak Forest Policy. Stringent forest laws and regulations to monitor and enforce forest-related activities further support the management framework.

In Peninsular, the Forestry Department of Peninsular Malaysia (FDPM) and respective state forestry departments are responsible for the management of PRF. The state forestry departments have control over the removal of timber from PRF, state land and alienated land forest. This is regulated by the National Forestry Act 1984 and previously guided by the National Forestry Policy 1978 (revised 1992). The Malaysian Timber Industry Board (MTIB) is the licensing authority for Peninsular in issuing export and import permits for timber and timber products.

In Sabah, the Sabah Forestry Department (SFD) is responsible for forest management, control of harvesting operations, royalty payment requirements as well as issuance of export and import licence in line with the Forest Enactment 1968, Forest Rules 1969, Forest (Timber) Enactment 2015 and Forest (Timber) (Registration) Regulations 2017.

In Sarawak, the Forest Department Sarawak (FDS) is responsible for forest management. This is regulated by the Forests Ordinance, 2015 (Cap. 71). Harwood Timber Sdn. Bhd. (HTSB) is an appointed agency to endorse all movement of timber throughout the state and including timber for export. Sarawak Timber Industry

Development Corporation (STIDC) is the authority to issue Timber Industry Licence as well as export and import licences for timber and timber products in Sarawak.

MTIB, SFD and STIDC are the respective licensing authorities for Peninsular, Sabah and Sarawak for issuing export and import licences/ permits for timber and timber products, as provided for under Schedule 2 of the Customs (Prohibition of Exports) Order 2023 and Customs (Prohibition of Imports) Order 2023. For timber products listed by the Convention of International Trade in Endangered Species of Wild Fauna and Flora (CITES), a CITES export or re-export permit issued by MTIB for Peninsular, SFD for Sabah, and Sarawak Forestry Corporation (SFC) for Sarawak, can be considered as having fulfilled the applicable domestic and CITES requirements.

2.0 WHICH LAWS REGULATE TIMBER HARVESTING AND EXPORTATION IN MALAYSIA?

2.1 Peninsular

2.1.1 Timber harvesting

- National Forestry Act 1984 [Act 313];
- Forest Rules of the respective States; and
- Environmental Quality Act 1974 [Act 127] - Section 34A, Environment Quality (Prescribed Activities) (Environmental Impact Assessment) Order 2015, Activity 5, First Schedule and Second Schedule.

2.1.2 Timber processing

(a) Timber and timber products (excluding furniture and components, pulp and paper products)

- Wood Based Industries Enactment of the respective States; and
- Wood Based Industries Rules of the respective States.

(b) Furniture and components

- Industrial Co-ordination Act 1975 [Act 156];
- Wood Based Industries Enactment of the respective States;
- Wood Based Industries Rules of the respective States; and
- Customs Act 1967 [Act 235].

(c) Wood pulp and paper products

- Industrial Co-ordination Act 1975 [Act 156];
- Wood Based Industries Enactment of the respective States;
- Wood Based Industries Rules of the respective States;
- Customs Act 1967 [Act 235]

2.1.3 Export of timber and timber products

(a) Products under Customs HS code 44, 47, 48 and 94

- Customs Act 1967 [Act 235], Customs (Prohibition of Exports) Order 2023; and
- Malaysian Timber Industry Board (Incorporation) Act 1973 [Act 105].

(b) Convention on International Trade in Endangered Species of Wild Flora and Fauna (CITES) listed timber species

- Customs Act 1967 [Act 235], Customs (Prohibition of Exports) Order 2023;
- Malaysian Timber Industry Board (Incorporation) Act 1973 [Act 105]; and
- International Trade in Endangered Species Act 2008 [Act 686].

2.2 Sabah

2.2.1 Timber harvesting

- Forest Enactment 1968 (Section 15, 24,28(A);
- Forest Rules 1969, Rule 12 (3);
- RIL Operation Guide Book-Code of Practice For Harvesting in Sabah;
- Environment Protection Enactment 2002; and
- Wildlife Protection Enactment 1997 (Section 38).

2.2.2 Timber processing

(a) Timber and timber products (including furniture, pulp and paper products)

- Forest Enactment 1968, Section 42 (e);
- Forest Rules 1969, Rule 19(1);
- Industrial Co-ordination Act 1975 [Act 156]; and
- Licensing Guidelines for the Wood-Based Industry in Sabah-Version 2, 2012.

2.2.3 Export of timber and timber products

(a) Timber and timber products under Customs HS code 44, 47, 48 and 94

- Customs Act 1967 (Act 235), Customs (Prohibition of Exports) Order 2023;
- Forest Enactment, 1968; and
- Forest Rules, 1969.
- Forest (Timber) Enactment 2015.
- Forest (Timber) (Registration) Regulations 2017.

(b) CITES-listed timber species

- Customs Act 1967 [Act 235], Customs (Prohibition of Exports) Order 2023; and
- International Trade in Endangered Species Act 2008 [Act 686].

2.3 Sarawak

2.3.1 Timber harvesting

- Forests Ordinance, 2015 (Cap. 71);
- Forest Rules, 1962;
- Wild Life Protection Ordinance, 1998 (Cap.26); and
- Natural Resource and Environment (Prescribed Activities) Order, 1994.

2.3.2 Timber processing

- Forests Ordinance, 2015 [Cap 71];
- Sarawak Timber Industry Development Corporation Ordinance 1973;
- Sarawak Timber Industry (Licensing) Regulations, 2025; and
- Industrial Co-ordination Act 1975 [Act 156].

2.3.3 Export of timber and timber products

- Customs Act 1967 [Act 235] ;
- Customs (Prohibition of Exports) Order 2023;
- Sarawak Timber Industry Development Corporation Ordinance 1973;
- The Timber Grading Regulations, 2008; and
- Wild Life Protection Ordinance, 1998 (Cap.26)

3.0 HOW DO TIMBER HARVESTING LAWS OPERATE IN MALAYSIA?

3.1 Peninsular

3.1.1 Harvesting and transportation regulations

FDPM and state forestry departments are responsible for the management of the PRF of the various states within the Peninsular.

Any company or person wishing to harvest and remove timber from a PRF and State land forest needs to have a valid harvesting licence issued by state forestry departments upon approval by State Authority. A licensee pays all premiums, royalty, forest development cess and other charges payable in respect of the licence and the harvested timber before claiming ownership of the timber from the licenced area.

Any company or person wishing to remove timber from an alienated land forest needs to have a valid removal licence issued by state forestry departments upon approval by State Authority. A licensee pays all royalty, forest development cess and other charges payable in respect of the licence and the harvested timber before removing of the timber from the licenced area.

Felled logs are inspected for payment of royalty and forest development cess at the Forest Checking Stations (FCSs). These are manned by the State Forestry Departments' officials, upon which a Removal Pass (RP) (**Attachment 1**) is issued for each lorry load. The RP carries a record of the type/species, volume of produce, and the royalty and forest development cess payable. The licensee must ensure that all logs transported from the designated FCSs to the mills are accompanied by a RP or Exchange Removal Pass (ERP) (**Attachment 2**). An ERP is issued by the State Forestry Department concerned in cases where the load has been inspected during transit or for a load transported from one mill to another.

The quantity of logs received by the mills as recorded in the RP/ERP will also be kept and maintained by the mills. The mills are required to keep a log book containing information on logs stored and processed in these mills.

The custodians of the RP/ERP are the primary processing mills (that is, the sawmills and plywood mills). Value-added processing mills, which usually source their timber supplies from primary processing mills, do not possess a RP/ERP.

The issuing of an Export Permit (**Attachment 21**) by MTIB demonstrates that these timbers have complied with the relevant legal requirements. In the case of other timber products that do not require an Export Permit from MTIB, the declaration on the endorsed Customs Export Declaration Form 2 (K2) (**Attachment 4**) will demonstrate compliance with the relevant legal requirements. An exporter of timber listed in **Attachment 5** must pay the necessary export cess.

3.1.2 Prohibition and restrictions of harvesting

A total of thirty-two (32) timber species have been identified by the state forestry departments to be retained in PRF. A licensee must observe that these identified species are retained during harvesting the licenced area within PRF managed under SFM. The list of species to be retained in the PRF is at **Attachment 3**.

This requirement has been incorporated into timber harvesting practices as a means to promote socially-friendly harvesting practices as well as to mitigate the deterioration of biodiversity and the environment. These species, the majority of which are wild fruit trees, are important food sources for the aborigines/indigenous people as well as birds and mammals.

However, the requirement to retain these species is not applicable to logs harvested from state land and alienated land. Thus the availability of any of these species in the market shall not necessarily be construed as illegal as these timbers will have undergone the due process of controls administered by the state forestry departments.

The issuing of an export permit by MTIB demonstrates that these timbers have complied with the relevant legal requirements. In the case of furniture and other timber products made using any of these species (for which an export permit from MTIB is not required), the declaration in Customs Export Declaration Form (K2) (**Attachment 4**) will demonstrate compliance with the relevant legal requirements.

3.1.3 Statutory charges

(a) Harvesting charges

The National Forestry Act 1984 [Sections 68 & 73] and the State Forest Rules and Wood Based Industry Enactment (Section 3 & 20) stipulate the statutory charges that need to be paid by a licensee to obtain a harvesting licence for the extraction of logs.

A licensee pays all premiums, royalty, forest development cess and other charges payable in respect of the licence and the harvested timber before claiming ownership of the timber from the licenced area.

(b) Export cess

An exporter of timber and timber products listed in **Attachment 5** must pay the necessary export cess, as provided for in Section 20 of the Malaysian Timber Industry Board (Incorporation) Act 1973.

3.1.4 Indigenous peoples' rights

Under the Aboriginal People Act 1954 (Act 134), the State Authority must ensure that areas gazetted as Aboriginal Reserves and Aboriginal Areas are excluded from the areas to be planned for harvesting except after consulting with the Director General of Orang Asli Affairs and in granting any such licence it may be ordered that a specified proportion of aboriginal labour be employed.

3.1.5 Production and manufacturing of Rubberwood products

Rubberwood (*Hevea brasiliensis*) is produced from logs harvested from rubber plantations which are planted for latex production. The trees are usually felled when their life span for the production of latex (at about 20 years) is no longer economical and replanting is necessary. Rubberwood is now being widely used for the manufacture of a variety of products and is considered an environmentally-friendly green product which is from wood residues from rubber smallholding/estate.

Commencing on 1 January 2022, MTIB is officially no longer issuing Statement of Legality for Rubberwood. Instead, selected timber and timber products are issued with the certificate of Malaysian Timber Legality Assurance System (MYTLAS) (Peninsular Malaysia). MYTLAS Certificate is the official document which certifies that the production of

rubberwood and rubberwood products are from legal source. Further details are at paragraph 4.1.4.

3.2 Sabah

3.2.1 Harvesting and transportation regulations

SFD is responsible to manage forests and regulate forestry activities in state of Sabah.

In order for an organisation or company to obtain the right to harvest in Sabah, the organisation or company shall obtain an approval of harvesting rights for the specified area, which shall not include areas with Native Customary Rights.

For harvesting on an alienated land, an organisation or company shall have a valid land title or a letter of confirmation on the status of the land application from the Assistant Collector of Land Revenue as well as a receipt of payment of land premium.

Prior to issuing a harvesting licence, the organisation or company shall obtain a letter of approval from the Natural Resources Office (NRO) for issuing a valid harvesting licence or coupe permit by SFD. Harvesting licence can be in a form of Sustainable Forest Management Licence Agreement (SFMLA) or Long Term Licence Agreement (LTL) (**Attachment 6**), Form I Licence (**Attachment 7**), or Form IIB (**Attachment 8**) in the case of timber from alienated land.

At FR, the SFMLA/LTL licensee shall have an approved Forest Management Plan (FMP) and Annual Work Plan (AWP) containing maps and description of the areas and types of operations to be carried out during the year and approved by SFD. In addition, the licensee shall have a Comprehensive Harvesting Plan (CHP) developed by a registered CHP contractor containing the total and net production areas; harvesting volumes, diameter, limits, species and protected areas approved by SFD and the CHP shall comply with the Reduced Impact Logging (RIL) Operation Guide Book requirements for harvesting and operations (roads, skid trails and log landings density and location, harvestable tree marking and stream buffer zones identification). CHP applies for Natural Forest Management area (NFM) while Comprehensive Plantation Plan (CPP) applies to Integrated Tree Plantation Area (ITP).

Apart from above, Sabah exercises various controls over timber harvesting operations depending on the land status. For timber extracted from a licence involving FR, state land and alienated land, all licensees must adhere to the conditions stipulated in the licence conditions:

- (i) A licensee must register a Property Hammer Mark (PHM), with the PHM stamped at the end of each log produced.
- (ii) A licensee must incise each extracted log with a serial number.
- (iii) A logging contractor must be registered with the SFD prior to commencing operations.

For an area involving FR and state land, only a licenced area is allowed for timber harvesting. For alienated land, timber can be felled for land clearance for agricultural purposes as the land is an alienated land, but no timber can be removed without royalty payment and with proper markings and thereafter issuance of Form IIB licence.

For timber extracted from FR, additional harvesting control is imposed on the employment of RIL. The operation will be guided by the approved CHP.

Among other harvesting operation controls include:

- The requirement to prepare daily harvesting records;
- Submission of Quarterly Logging Progress Report and Closing Inspection Report; and
- Prohibition of timber harvesting in steep slopes (25° and above) and buffer zones as stipulated in the licence conditions.

3.2.2 Prohibition and restrictions of harvesting

The conditions of harvesting licence stipulate several protected species of timber that are prohibited from being harvested in FR or Natural Forest Management Areas (**Attachment 9**).

3.2.3 Statutory charges

(a) Harvesting charges

- (i) Royalty payment

The requirement of royalty payment for all harvested timber is covered under Section 24C of the Forest Enactment 1968, and Rule 12 (1) of the Forest Rules 1969, that all logs to be transported to the final destination

must be royalty paid first prior to leaving the licenced area or approved royalty assessment area.

The licensee must apply for royalty assessment for their logs to the District Forestry Officer (DFO) and shall include supporting documents such as a Log Summary and Log List showing the timber species, log dimension and volume. The DFO will conduct field inspections and will verify the company's log list based on the Guideline for Measurement of Timber for Royalty Assessment and assess royalty payment based on the applicable royalty rates of timber.

Prior to the royalty assessment the following are checked:

- Logs bear a Property Hammer Mark;
- Logs bear a Forestry Department Inspection Mark; and
- All logs have a species symbol and serial number incised at both ends of the logs, and the logs' details and volume correspond to the company's log list and log summary volume.

Upon satisfaction of these procedural requirements, the company will pay royalty based on the assessment made by the DFO and a receipt of royalty payment will be issued.

Royalty paid logs will have the following documents or markings:

- Logs bear a Property Hammer Mark;
- Logs bear a Forestry Department Inspection Mark;
- Logs bear a Forestry Department Revenue Hammer Mark;
- All logs have a species symbol and serial number incised at both ends of the logs; and
- Timber Disposal Permit (TDP) (**Attachment 10**) which provide all the details of logs including: the license where the logs were extracted from; the serial number; log specifications by species; diameter and length; date of scaling; and reference of the royalty payment receipt.

(ii) Movement of Logs

Movement of timber is regulated by Rule 15(1) of the Forest Rules 1969, whereby all timber to be transported out must be accompanied by a RP (**Attachment 11**) upon payment of royalty to the state government, or a Transit Pass for the transportation of logs from the extraction area to the royalty assessment area. In addition, all logging trucks must also be registered with the SFD.

Prior to the transportation of logs to the final destination, the following are checked by the SFD:

- Logs bear a Property Hammer Mark;
- Logs bear a Forestry Department Inspection Mark;
- Logs bear a Forestry Department Revenue Hammer Mark;
- All logs have a species symbol and serial number incised at both ends of the logs; and
- All royalty paid logs are supported by TDP, which provide all the details of logs including the license where the logs were extracted from, the serial number, the logs' dimensions, and reference of the royalty payment receipt.

A RP (one per truck) will be issued upon satisfaction of all the above. The RP will indicate TDP numbers covered by the RP and the name of the receiving mill in the final destination.

Upon reaching the mill, logs and truck records and the RP are recorded in the log Arrival Book kept at the mill by the SFD, and the used RP is stamped as "Used Removal Pass".

(b) Export royalty

An exporter of round logs, timber and timber products, listed in **Attachment 12** must pay the relevant export royalty as provided for in the Forest Rules, 1969.

3.2.4 Indigenous peoples' rights

Community benefits and rights to occupy land and native users' right to forest resources are recognised, subject to the following requirements:

- Meeting legislative requirements covering customary rights relevant to forest harvesting activities including requirements covering the sharing of benefits and tenure rights.
- Meeting legislative requirements covering "free, prior and informed consent" in connection with the transfer of forest management rights and customary rights to the organisation in charge of the harvesting operation.
- Meeting legislative requirements that regulate the rights of indigenous people in relation to forestry activities. Other aspects that may need to be considered are land tenure, the right to use certain forest related resources or practice traditional activities on forest lands.

3.2.5 Production and manufacturing of Rubberwood products

Rubberwood (*hevea brasiliensis*) is produced from logs harvested from rubber plantations in stateland, alienated land and FR (Industrial Tree Plantation Zone of the SFMLA). In the case of state land and alienated land, rubber trees are planted for latex production and, both latex and timber production for SFMLA. The trees are usually felled when their life span for the production of latex (approximately 15 to 20 years) is no longer economical and replanting is necessary.

The harvesting of Rubberwood logs from alienated land only requires the consent of the rubber smallholding or estate owner. SFMLA production of rubberwood logs however, is subject to the same requirements as those imposed on any other timber products from FR.

Irrespective of the source of Rubberwood logs, all logs are subject to the issuance of RP from the SFD to ascertain their legality. Rubberwood logs produced from alienated land in Sabah are royalty exempted if processed domestically, while Rubberwood logs produced from FR (Industrial Tree Plantation Zone of SFMLA) are subject to royalty payment.

3.3 Sarawak

3.3.1 Harvesting and transportation regulations

Timber harvesting in Sarawak shall mean the taking, felling or removal of timber, and is regulated under the Forests Ordinance, 2015 (Cap. 71) and Forest Rules [G.N.107/1953].

Under the Forests Ordinance, 2015 (Cap. 71), any person(s) who wish to harvest timber must first obtain a licence from the FDS.

FDS processes and approves the General Harvesting Plan (GP) which shows the layout and size of coupes, harvesting sequence, proposed road networks, camp sites, place of royalty marking, transit log pond and other general planning particulars for the entire licensed area.

Upon approval of the GP, the FDS will process and approve the Detailed Harvesting Plan (DP). The DP contains operational prescriptions at the coupe level, the layout of logging blocks, surveyed road networks, protected or conservation areas as well as the proposed harvesting method. Further pre-harvesting safeguards to ensure compliance with

the approved GP and DP are provided by the need for the logging operators to apply for a *permit to enter coupe* (PEC). The PEC process requires verification of satisfactory ground compliance in terms of coupes and blocks boundary demarcation, preparation of topographical work map, road alignment and construction, tree enumeration before the endorsement of blocks for felling.

A licensee is required to register the company property mark with the Director of Forests as required under Rule 25 (1) of the Forest Rules [G.N.107/1953]. At the Forest Landing a licensee will do the following:

- Mark both ends of each log with his registered property mark;
- Scale and grades each log (determines the log volume);
- Affix a Log Production Identity (LPI) tag to each log; and
- Submit log details in the Daily Production Return (DPR) to FDS.

FDS checks to ensure that harvesting operations have taken place within approved areas in compliance with Forest Timber Licence (FTL) terms and conditions, and that the licensees use only approved LPI numbers. FDS checks and verifies the DPR information and uploads this into the Sarawak Logs Tracking and Forest Revenue System (REVLOG). REVLOG is a custom-build ICT tool and network application used in Sarawak to monitor and control the movement of timber and collecting the statutory charges. The licensee then moves the timber to the Place of Royalty Marking (PoRM)/Forest Checking Station (FCS) for royalty assessment and/or inspection.

A licensee shall apply for royalty assessment of their timber by submitting a Log Specification Form (Royalty Assessment) and Log Specification Summary (LSS) for timber that have been DPR captured in REVLOG. FDS will conduct the royalty assessment of the logs by embossing the state government hammer mark 'JH' at both ends of the timber.

At the PoRM/FCS, FDS will issue the RP (Royalty) (**Attachment 13**) / Royalty Certificate (**Attachment 14**) for timber that have been assessed for royalty and dues paid to the state government. The RP (Royalty) / Royalty Certificate shall be used to demonstrate the legality of timber harvesting in Sarawak.

In the movement of timber, HTSB has been appointed by the State Government through the Director of Forests as an authorised agency for the purpose of discharging such functions as prescribed under Section 64(5) and 64(7)(a) of the Forests Ordinance, 2015 (Cap 71).

HTSB will conduct a physical inspection of the royalty assessed timber from PoRM and subsequently issue the Endorsement Clearance Certificate (ECC) (**Attachment 15**) and the Shipping Pass (SP) / Land Transportation Pass (LTP). This is then followed by FDS issuing the RP (transit) (**Attachment 16**) before the timber are transported from the PoRM/FCS to either a mill or export point.

For timber that are to be exported, there is a further physical inspection carried out at the export point by HTSB followed by the issuance of the Export Clearance Certificate (ExCC) (**Attachment 17**). FDS then issues a RP (Transit) for export (**Attachment 18**), and STIDC issues the export licence. All documents must be in place before the Royal Malaysian Customs Department (RMCD) gives the port clearance for export.

3.3.2 Prohibitions and restrictions of harvesting

Totally protected plants and protected plants are two different categories of plants stipulated in Part I and Part II of the Second Schedule of the Wild Life Protection Ordinance, 1998 (Cap. 26) (**Attachment 19**).

The harvesting of timber is totally prohibited in Totally Protected Areas (TPA) such as National Parks, Nature Reserves and Wild Life Sanctuaries as stated in the National Parks and Nature Reserves Ordinance, 1998 (Cap.27) and the Wild Life Protection Ordinance, 1998 (Cap. 26).

A written permission from the Controller of Wild Life is required to collect or harvest any totally protected plants for scientific or educational purposes, failing which it is an offence under Section 30 (1) of Wild Life Protection Ordinance, 1998 (Cap. 26).

As for protected plants, harvesting is allowed in accordance with the terms and conditions of a licence issued by the Controller of Wild Life, failing which it is an offence under Section 30 (2) of the Wild Life Protection Ordinance, 1998 (Cap. 26).

3.3.3 Statutory charges

A licensee is required to deposit a security, guarantee or bond with the state government within a specified time upon the issue of the licence as indicated in the licence conditions.

Section 45(1), 46(1), 47(1), 48(1) and 48(2) of Forests Ordinance, 2015 (Cap 71) requires a licensee to pay royalties, premiums and fees payable to the state government for timber harvested from the licenced area.

3.3.4 Indigenous peoples' rights

Under the Second Schedule of the FTL, lands subject to Native Customary Rights (NCR) are excluded from the licenced area. However, these areas may be allowed to be harvested with prior consent of the NCR land owners and subsequent approval of the Director of Forests.

In addition, under the Forests Ordinance, 2015 (Cap. 71), at the request of a community, the State can constitute any State land to be a Communal Forest (CF). The constitution of the CF falls under Part III Chapter 2 of the Forests Ordinance, 2015 (Cap. 71) which means making state land into a CF after fulfilling the due process. The community may take any forest produce from this area for their own domestic use.

4.0 LICENCES, PERMITS AND CERTIFICATION SCHEMES

4.1 Peninsular

4.1.1 Export permit

(a) **Timber and timber products under Customs HS code 44 and 94**

Any company or person engaged in the export of timber and timber products falling under HS Codes 44 and 94 must register with MTIB. Registered companies or persons are issued with Certificates of Registration (**Attachment 20**), renewable annually. Registered companies are allowed to export these products upon obtaining an Export Permit from MTIB.

The Second Schedule of the Customs (Prohibition of Exports) Order 2023 lists the timber and timber products that require an MTIB-issued Export Permit (**Attachment 21**) prior to an export. List of products that require an Export Permit is as shown in **Attachment 22**.

(b) **Timber and timber products under Customs HS Code 47 and 48 (pulp and paper products)**

Exporters of products under HS Codes 47 and 48 must make an appropriate declaration using Customs Export Declaration Form 2 (**Attachment 4**) and submit to RMCD for export clearance.

4.1.2 Import permit

The Second Schedule of the Customs (Prohibition of Imports) Order 2023 lists products for which an import permit from MTIB is required for importation into Peninsular.

The Import Legality Regulation (MTIB Director General Circular Ref. (7) LPKM 1/155/1/1 dated 7 June 2018) has been introduced to importers to ensure legality of timber and timber products imported into Peninsular. The regulation became fully enforced from 1 July 2017 and importers need to ensure compliance prior to the issuance of an import licence.

In addition, importation of logs, baulks, sawntimber, plywood, fibreboard and chipboard/particleboard (Customs HS Code of 4403, 4407, 4410, 4411 and 4412) products requires the submission of following documents:

- (a) CITES permit/certificate (if related to scheduled species of timber); and
- (b) copy of the Certificate of Origin, including any one of the legality documents from exporting economy, as follows:
 - (i) Forest Law, Enforcement, Governance and Trade (FLEGT) licence; or
 - (ii) Certificate issued by a recognised timber certification body; or
 - (iii) Certificate of Voluntary Legality Scheme; or
 - (iv) Any legality document issued by any recognised agency / corporation / industry association; or
 - (v) Self-declaration documents by the exporter with endorsement by the authorities of the exporting economy; or
 - (vi) Copy of the Customs Export Declaration from exporting economies.

For other timber products, an importer is required to make an appropriate declaration in Custom Import Declaration K1 (**Attachment 23**) and seek clearance from RMCD prior to import.

4.1.3 Trade in CITES-listed timber species

As the Management Authority for timber species in Peninsular and the Federal Territory of Labuan, MTIB is responsible for issuing export, import and re-export permits (**Attachment 24**) for CITES-listed timber species.

4.1.4 Certification/legality verification scheme

(a) Malaysian Timber Certification Scheme (MTCS)

MTCS is a voluntary domestic certification scheme operated by the Malaysian Timber Certification Council (MTCC).

The MTCS provides independent assessment for sustainable forest management practices and audit of timber product manufacturers and exporters under chain of custody certification to ascertain that the timber products manufactured and exported are sourced from MTCS-certified forests. To ensure credibility, robustness and acceptance of the scheme amongst local and international stakeholders, MTCC strives to ensure MTCS's endorsement with PEFC remains updated and meets international requirements.

Forest management certification covers social, environment and economic aspects as stipulated in the MTCS ST 1002:2021 Malaysian Criteria and Indicators for Sustainable Forest Management (MC&I SFM). The MC&I SFM is used for the certification of forest management of natural forest and forest plantations in Malaysia.

**(b) Malaysian Timber Legality Assurance System (MYTLAS)
(Peninsular Malaysia)**

MYTLAS is the timber legality assurance system for Peninsular which covers timber and timber products derived from logs harvested from natural forests and plantation forests whether in PRF, state land and alienated land. It also includes rubberwood from replanting operations and imported timber which complies with Peninsular's import regulations. A total of 12 timber and timber products as listed in **Attachment 25** are covered in the scope of MYTLAS.

Legal timber is defined in specific terms by the compliance with all the relevant laws and procedures governing the entire supply chain from the forest, the processing mills and finally to the export point. The applicable laws and procedures are listed in MYTLAS. The laws are clustered under six Principles (P) as follows:

- P1 - Right to harvest
- P2 - Forest operations
- P3 - Statutory charges
- P4 - Other users' rights
- P5 - Mill operations
- P6 - Trade and customs

The control procedures under MYTLAS are guided by these six principles and each of these principles is supported by a number of criteria. Each criterion is elaborated in a table which indicates:

- the exact legislative reference relevant to the respective criterion, which must be complied with;

- the verification procedures to demonstrate compliance;
- the responsible implementing agencies; and
- the outputs of the verification procedures.

MTIB as the licensing authority is responsible to issue MYTLAS certificate for timber to be exported to European Union (EU) in accordance with the requirements of the Peninsular TLAS. Commencing 1 January 2022, MYTLAS issuance has been expanded to all economies. Implementation of MYTLAS involves close coordination between the licensing authority and the implementing agencies (State Forestry Departments, Department of Environment, Department of Occupational Safety and Health, Department of Labour, Social Security Organization, Department of Agriculture, Malaysia Quarantine and Inspection Services and RMCD).

An Implementing Agency Coordination Committee (IACC) meets regularly to coordinate, monitor and consider reports on the enforcement activities of the Implementing Agencies. The IACC will also recommend remedial actions on non-compliances and other necessary measures to effectively implement MYTLAS.

Apart of IACC, TLAS Advisory Group (TAG) has been established to ensure transparency and good governance. The TAG comprises members from civil society, industry, technical experts and representatives from key implementing agencies. TAG meets regularly to discuss reports submitted by the IACC on the overall implementation of MYTLAS including non-compliances, the need for remedial actions, addressing concerns and feedback from stakeholders, annual reports by the third-party auditor and reports on the enforcement activities of the implementing agencies.

4.2 Sabah

4.2.1 Exports licence

Any company or person engaged in the export of timber and timber products falling under these codes must be registered by SFD. Registered companies or persons are issued with an Exporter Registration Certificate (**Attachment 26**). Registered companies or persons are allowed to export timber and timber products with an Export Licence (**Attachment 27**) issued by SFD, upon satisfaction of all timber and timber products export requirements. For exportation of logs,

exporters are required to seek prior written approval from Chief Conservator of Forest before an export licence may be issued.

The Second Schedule of the Customs (Prohibition of Exports) Order 2023 lists timber and timber products that require an export licence/permit from SFD prior to export. Under the Custom Act 1967 (Section 10), SFD officers are authorized by the Director General of the RCMD to issue an export licence/permit for every shipment of timber and timber products from Sabah.

Exporters of products under HS Codes 47 and 48 must make an appropriate declaration using Customs Export Declaration Form (K2) (**Attachment 4**) and submit it to RMCD for export clearance.

4.2.2 Import licence

All products listed in the Customs (Prohibition of Imports) Order 2023 require an Import Licence (**Attachment 28**) from SFD prior to their importation into Sabah. Any company or person engaged in the importation of timber and timber products listed under the Customs (Prohibition of Imports) Order 2023, must be registered by SFD (**Attachment 29**). Registered companies or persons are allowed to import timber and timber products with an import licence issued by SFD, upon satisfaction of all timber and timber products import requirements. For the importation of logs, it is a requirement that prior written approval from the Chief Conservator of Forests be obtained before an import licence may be issued.

For other timber products, an importer is required to make appropriate declaration in Custom Import Declaration K1 (**Attachment 23**) and seek clearance from RMCD prior to importation.

4.2.3 Trade in CITES-listed timber species

SFD is the Management Authority of CITES for timber products in Sabah and is responsible for the issuance of export, import and re-export permits for any timber species listed under CITES. The CITES Export, import and re-export permits is as **Attachment 24**.

4.2.4 Certification/legality verification scheme

The Sabah Timber Legality Assurance System (Sabah TLAS) has been developed in response to EU FLEGT programme by SFD. The Sabah

TLAS spells out the rules and requirements that will be used to monitor whether applicable laws are met and timber can be traced through the supply chain. The system has been enforced in Sabah since 2009 by SFD in order to administer the TLAS on the local field.

The main objective is to combat and eradicate illegal timber trade and ultimately illegal logging, at the domestic and international scale in line with the vision and mission of the SFD. A third party independent auditor has been appointed by SFD to conduct field assessments based on the approved Principle and Criteria stated in the Sabah TLAS. Sabah TLAS is a due diligence system that ensures timber products originating from Sabah are harvested, processed and traded in compliance with laws and regulations, as well as international standards.

Apart from Sabah TLAS, the internationally recognized schemes such as MTCS, PEFC and Forest Stewardship Council (FSC) are widely used in the certification of forest management units (FMUs) in Sabah.

4.3 Sarawak

4.3.1 Export licence

Under Sarawak Timber Industry Development Corporation Ordinance 1973, it is a mandatory requirement for any persons or companies engaged in or associated with the manufacture, sale and marketing (export and imports) of timber and timber products in Sarawak to obtain with Timber Industry Licence (**Attachment 30**) from STIDC.

Timber Industry Licence which has been issued to any persons or companies must apply for renewal on yearly basis. Licensed companies are allowed to export timber and timber products upon obtaining an export licence from STIDC.

The Timber Grading Regulations 2008 made under Section 24 of Sarawak Timber Industry Development Corporation Ordinance 1973 requires sawn timber for export to be graded and issued with Grading Certificate (**Attachment 31**).

By way of delegation of power under the Customs Act 1967 (Section 10), STIDC officers are authorised by the Director General of the RMCD to issue an export licence for every shipment of timber and timber products from Sarawak. The export license for timber and timber products is endorsed by STIDC at the back of the Customs Declaration Form 2 (K2)

(Attachment 32). The export licence is a document of proof of legal timber exported from Sarawak. The licence will only be issued after the legal compliance in the chain of timber harvesting process is fulfilled. The Second Schedule of the Customs (Prohibition of Exports) Order 2023, lists the timber and timber products that require an Export Licence prior to an export.

For protected plants, the Form of Licence/Permit **(Attachment 33)**, issued by the Controller of Wild Life for protected species, is a prerequisite document for STIDC to issue an export licence.

4.3.2 Import licence

Importers of timber and timber products are required to be issued with Timber Industry Licence by STIDC. To import logs, importers are required to seek prior approval of log import quota from the Ministry of Natural Resources and Urban Development (MUDeNR), Sarawak.

The Second Schedule of the Customs (Prohibition of Imports) Order 2023, lists products for which an import licence from STIDC is required for importation into Sarawak. The following documents are required for application of import licence:

- CITES Certificate (if applicable);
- Certificate of Origin (COO);
- Phytosanitary Certificate; and
- Any other relevant document, if any.

Every shipment of imported timber and timber products into Sarawak must have an import licence **(Attachment 34)** from STIDC and Customs Declaration Form 1 (K1) **(Attachment 35)** from RMCD. The consignment is subject to a physical inspection.

For logs, Removal Pass **(Attachment 36)** to be issued by STIDC before an importer is allowed to transport the logs to a mill.

4.3.3 Trade in CITES-listed timber species

For plant species listed under Appendices I and II of CITES, the CITES Certificate **(Attachment 24)** will be issued by the SFC. This certificate is also a prerequisite document for the issuance of an import and export licence by STIDC.

4.3.4 Certification/legality verification scheme

The Sarawak Timber Legality Verification System (STLVS) is the timber legality assurance system that has been in place for Sarawak which covers logs harvested from natural forests and manufacturing and trading of timber products in accordance to the existing state laws and regulations. The STLVS has been enhanced to allow for a third-party monitors and audit processes.

Legal timber is defined by the compliance with all the relevant laws and regulations governing the entire supply chain from the forest, the processing mills and the export points. The applicable laws are listed in the STLVS. The STLVS Standard is consist of six Principles (P), as follows, supported by a number of criteria:

- Principle 1: Right to Harvest
- Principle 2: Forest Operations
- Principle 3: Statutory Charges
- Principle 4: Other User Rights
- Principle 5: Mill Operations
- Principle 6: Trade and Customs

The MUDeNR, Sarawak monitors the implementation of the STLVS by the various implementing agencies to ensure good governance.

Apart from STLVS, internationally recognized schemes such as MTCS and PEFC are widely used in the certification of FMUs in Sarawak.

5.0 LEGALITY OF TIMBER PRODUCTS MANUFACTURED IN MALAYSIA

5.1 Peninsular

5.1.1 Traceability of domestic sources

Laws and regulations covering the supply of logs from domestic sources are explained in Section 3.1.

5.1.2 Traceability of import sources

Laws and regulations covering the supply of logs from import sources are explained in Section 4.1.

5.2 Sabah

5.2.1 Traceability of domestic sources

Laws and regulations covering the supply of logs from domestic sources are explained in Section 3.2.

5.2.2 Traceability of import sources

Laws and regulations covering the supply of logs from import sources are explained in Section 4.2.

5.3 Sarawak

5.3.1 Traceability of domestic sources

Laws and regulations covering the supply of logs from domestic sources are explained in Section 3.3.

5.3.2 Traceability of import sources

Laws and regulations covering the supply of logs from import sources are explained in Section 4.3.

Attachment 9 List of Prohibited Species for harvesting in FR

No.	Scientific Name	Local Name	Purpose
1.	<i>Shorea macrophylla</i> , <i>Shorea gysbertinana</i> , <i>Shorea pinangah</i>	All Tengawang/Kawang species	Fruit
2.	All <i>Mangifera</i> species	All Asam family-Mangga or Macang Hutan	Fruit
3.	All <i>Durio</i> species	Durian	Fruit
4.	<i>Triomma</i> spp., <i>Daryodes</i> spp. and <i>Santiria</i> spp., except <i>Canarium</i> spp.	All Kedondong species	Fruit
5.	All <i>Drancontomelon</i> spp.	Sengkuang	Fruit
6.	All <i>Lansium</i> spp.	Langsat	Fruit
7.	All <i>Bacaurea</i> spp.	Tampoi, Rambai and Belimbing Hutan	Fruit
8.	All <i>Artocarpus</i> spp.	Terap, Buruni, Pulutan/Cempedak	Fruit
9.	All <i>Nephelium</i> spp.	Meritam	Fruit
10.	All <i>Paranephelium</i> spp.	Mata Kuching	Fruit
11.	<i>Gonystylus bancanus</i>	Ramin	Conservation
12.	All <i>Aquilaria Malaccensis</i>	Gaharu/Karas	Conservation (prohibited in Forest Reserves and state land, unless specified)
13.	All <i>Koompassia excels</i>	Mengaris	Depository of wild honey
14.	<i>Eusideroxylon zwageri</i>	Belian	Conservation
15.	<i>Protoxylon malagangai</i>	Belian Malagangai	Conservation
16.	<i>Intsia palembanica</i> and <i>Sympetalandra borneensis</i>	All Merbau species including Merbau Lalat	Conservation
17.	All <i>Lithorcarpus</i> spp.	Mempening	Conservation
18.	All <i>Castanopsis</i> spp.	Berangan/Chestnuts	Conservation
19.	All mangrove species	All mangrove species	Conservation-

No.	Scientific Name	Local Name	Purpose
			unless for use by Natives and Charcoal factories
20.	Any trees marked by the Chief Conservator of Forest for retention	Any trees marked by the Chief Conservator of Forest for retention	Conservation and seeds (mother trees)
21.		Any trees from the genera stipulated in Schedule I - Forest Rules 1969, if the diameter is less than the minimum diameter prescribed unless marked for felling by the Chief Conservator of Forests.	Conservation
22.		All trees below 60cm dbh or above 120cm dbh unless authorized by the Chief Conservator of Forests for felling.	Conservation

All trees listed in 1 to 22 above are all prohibited from felling unless authorized by the Chief Conservator of Forests.

GRADING CERTIFICATE
(Issue under Regulation 3 of the Timber Grading Regulations, 2008)

CERTIFIED that the sawn timber shown on the attached Schedule of Timber Shipped and summarised below, which is consigned to (name of consignee) _____ and to be shipped to (place and country of final destination) _____ on the (vessel) _____ sailing from (port) _____ KUCHING - SARAWAK on or about (date) 31.05.2023 has been graded by a certified Timber Grader in accordance with the Malaysian Grading Rules for Sawn Hardwood Timber, that the timber is of the kinds and grades shown in the Summary below; and that the appropriate Grade and other marks shown in the attached Schedule of Timber Shipped have been placed on the timber.

SUMMARY

Kinds of Timber	[REDACTED]		
Specifications	Strips, Shorts		
Grades	MERCHANTABLE		
Total number of pieces	11677		
Total volume	20 2593		Cubic Metres
Timber graded for (name of Buyer)	[REDACTED]		
On (date)	2023 - 24/05/2023		by certified Timber Grader
Number(s)	TG [REDACTED]		

Grading Authority
 Sarawak Timber Industry Development Corporation

Date of Issue 29.05.2023
 Date of Expiry 28.06.2023

This Grading Certificate has been approved on-line by the Grading Authority and does not require a signature thereon.

IMPORTANT NOTES

- i) Volumes shown in this Grading certificate has been taken from the Schedule of Timber Shipped prepared by the Buyer and are not guaranteed by the Grading Authority.
- ii) Timber is graded and measured as the Timber Grader finds it, and Certificates of Grades applies only for the date of inspection of the timber. Buyers are advised to request re-grading of the timber and the issue of a new Grading Certificate should the lapse of time or method of treatment or storage of the timber between examination and shipment permit the possibility of degrade.
- iii) In respect of timber received in an unsatisfactory condition, it should be brought to the attention of the Grading Authority as soon as possible by the affected parties.
